ABOUT RED SKY

Red Sky Dance Theater is Canada's leading company of First Nation performance in dance, theatre and music. This multi-award-winning company was founded by Artistic Director Sandra Laronde in 2000. Red Sky creates and tours original work for young audiences on stages across Canada and the world.

SYNOPSIS

Young Nuna has started to hear unusual sounds, she hears the waters cry. Realizing that her granddaughter has the ability to hear the spirits of rushing rivers and soaring mountains, Nuna's grandmother helps her set off on a journey to discover why. The journey takes her towards the place where the rivers and the mountains meet, where the great mountain weeps. **Does Nuna have the power to answer the mountain's cry?** In this retelling of the Northern Plains traditional story of Jumping Mouse, a young girl discovers the power of nature and the importance of courage.

We Use Water Every Day!

Color the drops that are saving water.
Then label the picture **CONSERVE** or **WASTE**.

Protect Your Watershed

Help Dewey clean the area before the garbage ends up in the waterway.
Circle each piece of trash. Then draw a line from it to the garbage can.

ice cream sticks

juice box

tire

soda can

flower

snail

fish

candy wrapper

SYNOPSIS

Young Nuna has started to hear unusual sounds, she hears the waters cry. Realizing that her granddaughter has the ability to hear the spirits of rushing rivers and soaring mountains, Nuna's grandmother helps her set off on a journey to discover why. The journey takes her towards the place where the rivers and the mountains meet, where the great mountain weeps.

Does Nuna have the power to answer the mountain's cry?

In this retelling of the Northern Plains traditional story of Jumping Mouse, a young girl discovers the power of nature and the importance of courage.

WATER CONSERVATION

Did you know that kids can make a very important difference towards water conservation? But first off, why do we even need to know about conserving water? Water is a natural resource that we derive from the Earth. Without it, we would not be able to live! Imagine a world with no water at all. You wouldn't be able to drink it, bathe, swim and so on. Without clean water, other creatures, such as plants, animals, birds and ocean life would also get sick and die after drinking polluted water. You can make a huge impact simply by starting at home and changing the way you and your community use water. To get an idea of how much water we could all save if we all made a small effort, think about this: If every person across the nation flushed their toilets one time less every day, together they could all save enough water to fill a lake as large as a mile wide and long and four feet in depth! Now that you know how easy it can be to help save water, try some of the ideas below and start doing your part to change our world.

The Wonder of the Water Cycle

It Never Ends!

esvno re

Match them up!

Read about the parts of the water cycle below. Then write the correct number in the waterdrops beside the key words in the picture.

- 1 Water is heated by the sun. The water changes to vapor and rises into the air.
- 2 As it cools, the vapor turns into tiny water droplets. These join together in the sky to make clouds.
- 3 When the clouds can't hold any more water, it falls to the Earth as rain or snow.
- 4 Some water runs on top of the ground and then into lakes, streams, rivers and oceans.
- 5 Water that goes underground is stored in layers of soil and rock known as an aquifer.

For more water fun, UNSCRAMBLE the letters in the large cloud above to find out how you can help save your water supply.

Answers: 1-evaporation, 2-condensation, 3-precipitation, 4-runoff, 5-percolation, word scramble- conserve
